Interview

Name:

1. Are you a keen user of mobile applications? Do you use them rather for personal usage or for your job?

2. Do you have children? *If your child went missing, what do you think you would you do?* Has it ever happen to you? Maybe with somebody's else child? What did you do?

3. Would such a message annoy you?

4. What a default distance should be?

5. Have you ever used similar application? Does this project reminds you of something else?

6. Do you think people would react after the alert? How?

7. Risk: people will not install the application because it (child goes missing) does not happen often enough. What do you think?

8. Would you prefer to have this application in your language?

9. Do you think alerts should be available also for others like aunts, uncles, grandparents or nannies?

10. Would you add anything?
